CHIROPRACTIC AND FUNCTIONAL MEDICINE

## FUNCTIONAL MEDICINE TESTING INCLUDE:

### Heart Health

Reports the overall health of your heart, the risk of developing diabetes, as well as chronic inflammation levels.

### Food, Inhalant & Candida Screen

Measures IgG Antibodies in response to 240 foods, 48 inhalants and Candida that can lead to chronic health problems.

### Sleep & Stress (Adrenals)

Reports based on measuring stress hormones and melatonin levels.

### GI Mapping

Complete GI testing that looks for bacteria, parasites, viruses - including H. Pylori, and signs of leaky gut.

### Men's Health

This test kit measures hormones essential for men's overall health. This includes muscle strength, bone density, weight gain and the aging process.

The following markers are:

- Estrogen
- Testosterone
- DHEA
- Cortisol

### Women's Health

This test kit measures hormones essential for women's overall health. A balance of these hormones affects muscle strength, bone density, weight gain, pregnancy and the aging process.

The following markers are:

- Estrogen
- Testosterone
- Progesterone
- DHEA
- Cortisol

### DNA

This is the most advanced panel/test in genetic science and health management tools. Through our revolutionary saliva-based DNA testing process, evaluation of 1,000s of genes allows you to peer into your cells, influence your current and predict the future along the personal insights and recommendations based on your genetics.
